

Burning CDs on a Macintosh

1 Place a blank CD in the CD burner on your computer.

2 On some machines, a message appears asking you what you want to do with the blank CD. Choose the action: Open Finder and click OK.

If you don't see this message, proceed to step 3.

Now, you can simply drag and drop the files you want to burn onto the "untitled CD" icon located on your desktop

3

4 Once you have dragged all the files you want to burn to the CD icon, you can pull down the File menu and select "Burn Disc."

That's it!
