

Tech Tips

No 3: Wimba Voice Tools

What can you do with the new Wimba Voice Tools in Blackboard?

Voice Recorder

Record. Stop. Play. Just as easily as you use a cassette player, you can record your voice and play it back directly in Blackboard. You can also save audio recordings and play them on your favorite mp3 player.

Voice Email

Record your voice in an email to send to your Blackboard instructors and/or enrolled students. They'll be able to reply with their own voice emails too.

Voice Board

Create a vocal discussion board in Blackboard and post voice recordings as well as text. It's like a Learnlink conference with sound!

Voice Direct

Create a live online voice conferencing area, similar to a conference call on a phone with multiple participants. Wimba allows you to archive the live voice conference and also type text chat while you are speaking.

Here is a screenshot of a sample Voice Email.

Contact Jose at jose.rodriquez@emory.edu to request Wimba Voice Tools for your Blackboard course.
